

Rounded Corner Business Cards

About the knife templates

- Whirlwind Print's InDesign form cut templates contain a **'knife'**.
- The **'knife'** file has been set-up on the locked **'template'** layer of the InDesign file.
- Place your PDF file on the **'file'** layer and create a new PDF file. The new file will include the **'knife'**.

Template Colour

- We have set all our **'knife'** lines in Pantone colour **'072'** and the swatch has been renamed **'knife'**.
- **PLEASE NOTE:** It is important that this remains unchanged.

About the 'knife' file

- The **'knife'** file on the **'template'** layer is an indicator of where the job will fold. It will not print on your job.
- Please do not alter this file as it represents a pre-determined folded section.
- Only apply forme to the front artwork. If your artwork is double sided the back artwork (second page of the PDF) does not require the knife line.

Bleed

- Ensure that you have **3mm** (minimum) of bleed where any background colour/images extend past the trim edge.

Ordering

- **PLEASE** refer to the number that is on the PDF file name, so that we can match up that template with your print job. i.e.: *BC2RC290x45mm.pdf*
